

■ IC Card Manufacture OLD structure (Structure 1.)

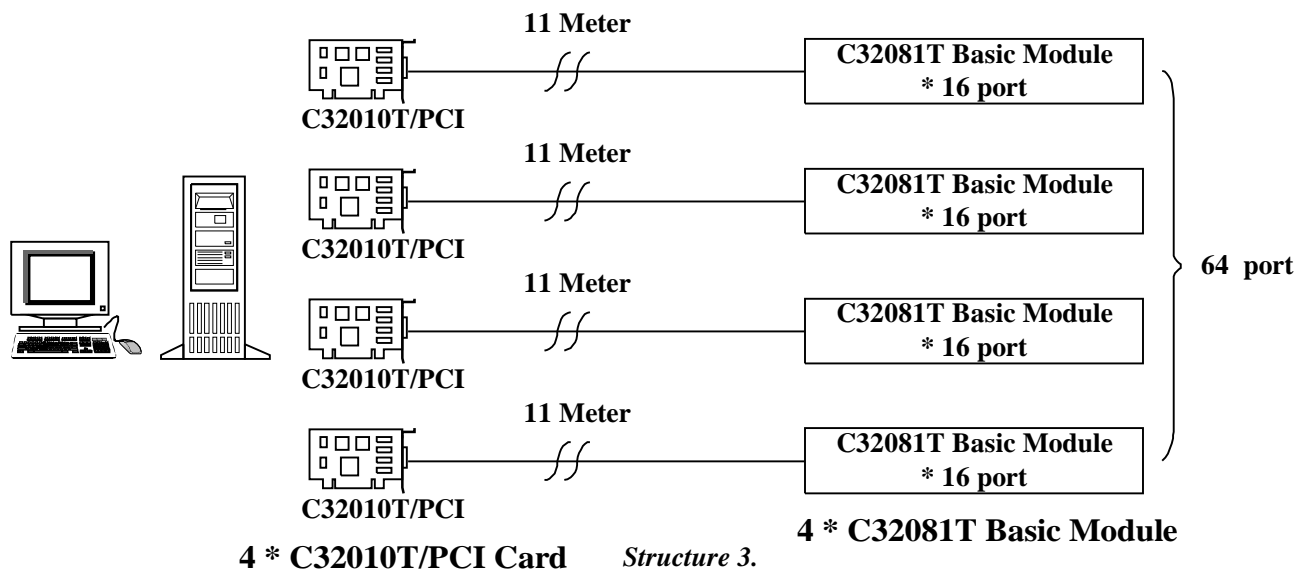

■ IC Card Manufacture Current structure (Structure 2.)

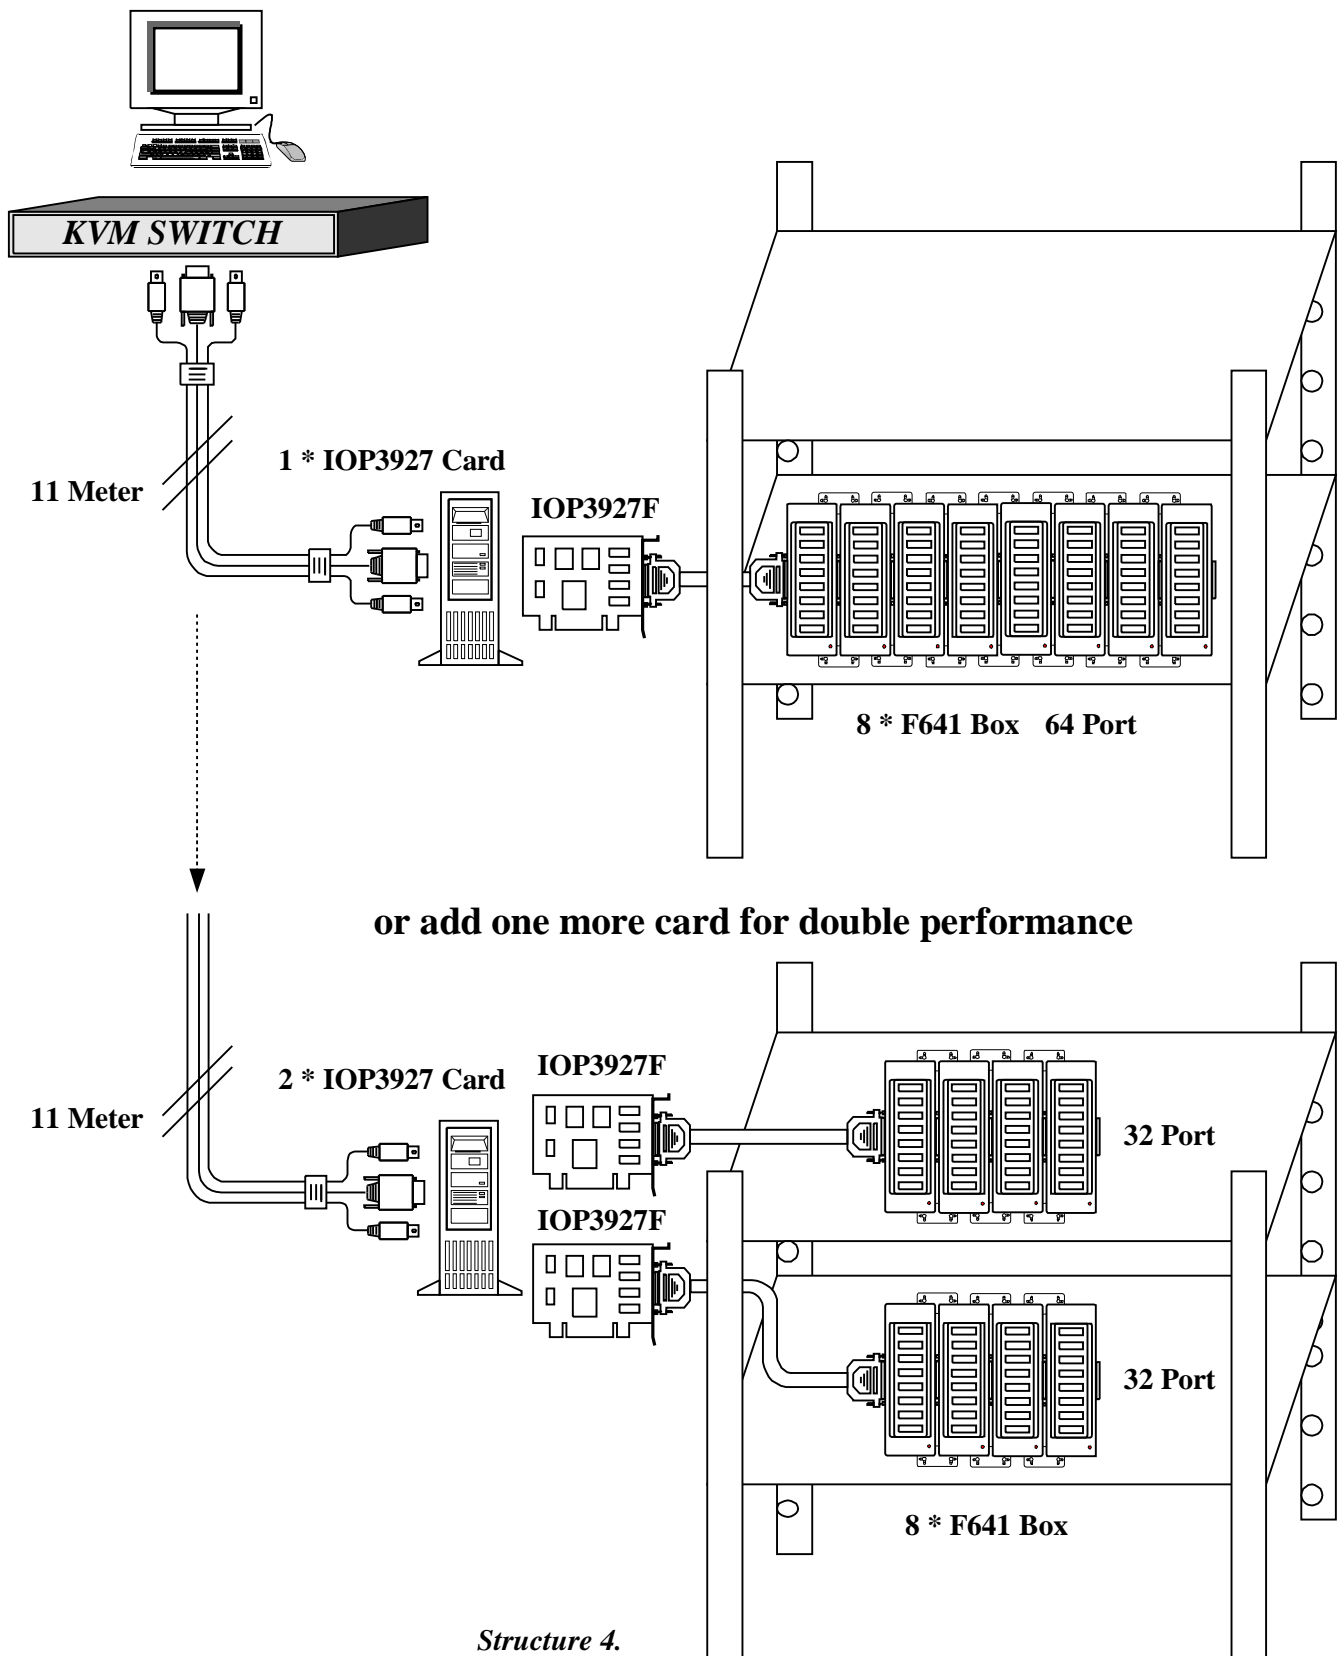

Add one more set for higher performance.

■ Add one more set for higher performance. (Structure 3.)

■ **RAYON'S New Structure. (Structure 4.)**

- (1) KVM to be used as console repeater.
- (2) HOST and IOP3927 with 8 F641 Box in Rack mount structure.

■ Merit :

◆ IOP3927 card is 3.3 V & 5V PCI slot compatible.

C320turbo/PCI is 5V PCI slot only.

◆ For 60 port application (cost consideration).

(1) IOP3927F card with 8 F641 Bo and 1 set KVM.

or 2*(IOP3927 card with 5 F641 Box) total 80 ports.

(2) 3*(C320turbo/PCI card with C32081 and C32082)

◆ For redundancy consideration.

(1) Extra F641 Box work on Line for redundancy.

(2) C320 work off Line for redundancy and can't confirm activity.

(3) No software modification.
