

Digital Input/ Output

DIGITAL I/O

Interface boards that provide computers with digital signal I/O functions.

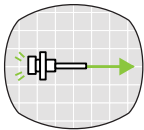

They monitor the status (ON/OFF) of relays, operating switches and measurement devices as well as controlling (ON/OFF) lamps, 7-segment display units and relays.

These boards can also be used as an interface for conducting digital communication with controllers such as PLC or microcomputers.

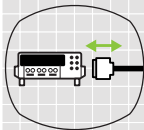

Application
Monitoring status of contact points and switches

Description
Inputs ON/OFF signals

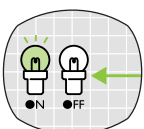

Application
Measurements of individual sensors

Description
Inputs BCD / binary data

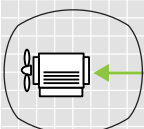

Application

Bus Specifications

PCI Express Product is PCI Express standard compliant and can be used in the computer equipped with PCI Express bus expansion slot.

PCI Product is PCI standard compliant and can be used in the computer equipped with PCI bus expansion slot.

USB 2.0 Product is USB standard compliant and can be used in the computer equipped with USB2.0/1.1 ports. Supports USB2.0 high-speed mode(480Mbps).

Card Bus Product supports Cardbus that is a 32-bit PC card standard bus.

PCMCIA Product supports 16-bit PC card standard.

Board Size

Low Profile

Product is PCI standard/Low Profile compliant. A bracket for standard-size PCI slots is provided.

Supported Connectors

- 100-pin 0.8mm Pitch
- 68-pin 0.8mm Pitch
- 37-pin D-SUB
- 96-pin Half Pitch
- 50-pin Mini-Ribbon

Indicates the number of pins and shapes of connectors used for external connection. The supported cables and accessories will vary depending on these specifications.

CONTEC provides a wide variety of cables and accessories to suit your needs.

- Cables with connectors on both ends Accessories (Terminal block, etc.) **Q-07**
- Cables with a connector on one end Connector set **Q-11**

I/O Points

Supported softwares

Windows Driver API-TOOL Drivers for Windows are provided. The license-free driver software (both development and runtime) provides commands to interface boards or cards using Windows standard Win32API function (DLL).

Linux Driver API-TOOL Drivers for Linux are provided. The license-free driver software (both development and runtime) that provide commands to interface boards or cards using module-style device drivers and the shared library.

LabVIEW

VI-DAQ, a VI library for use with National Instruments' LabVIEW can be downloaded from our Web site. With function format similar to that of LabVIEW's "Data Acquisition VI", VI-DAQ set-up is not complicated therefor simplifying device operation.

Points

Isolated I/O interface and internal logical circuits are insulated by Opto-couplers and relay contacts in order to prevent electrical interference with the PC. Requires additional power to drive external circuits.

High Voltage I/O interface supports high-voltage circuits [those exceeding 24VDC]. Some have an output interface that supports AC.

Non-isolated I/O interface and internal logical circuits are not insulated. These respond at a higher speed than insulated devices.

Hi-Speed Opto-coupler Uses a high-speed Opto-coupler that enables a response of 1μ to 5μsec.

Power On board A power source is integrated on the device in order to drive input circuit Opto-couplers and I/O circuits. These are useful when additional power sources aren't available.

Digital Filter Disables level (ON/OFF) changes that take place faster than the set value and prevents incorrect input due to noise and chattering.

Negative Common I/O interface supports a current sourcing circuit. It is called "negative common" because the common polarity is reverse to that of a current sinking circuit.

Surge Protection Output interface is equipped with a Zener diode that prevents damage and / or malfunction due to a surge in voltage and incoming current.

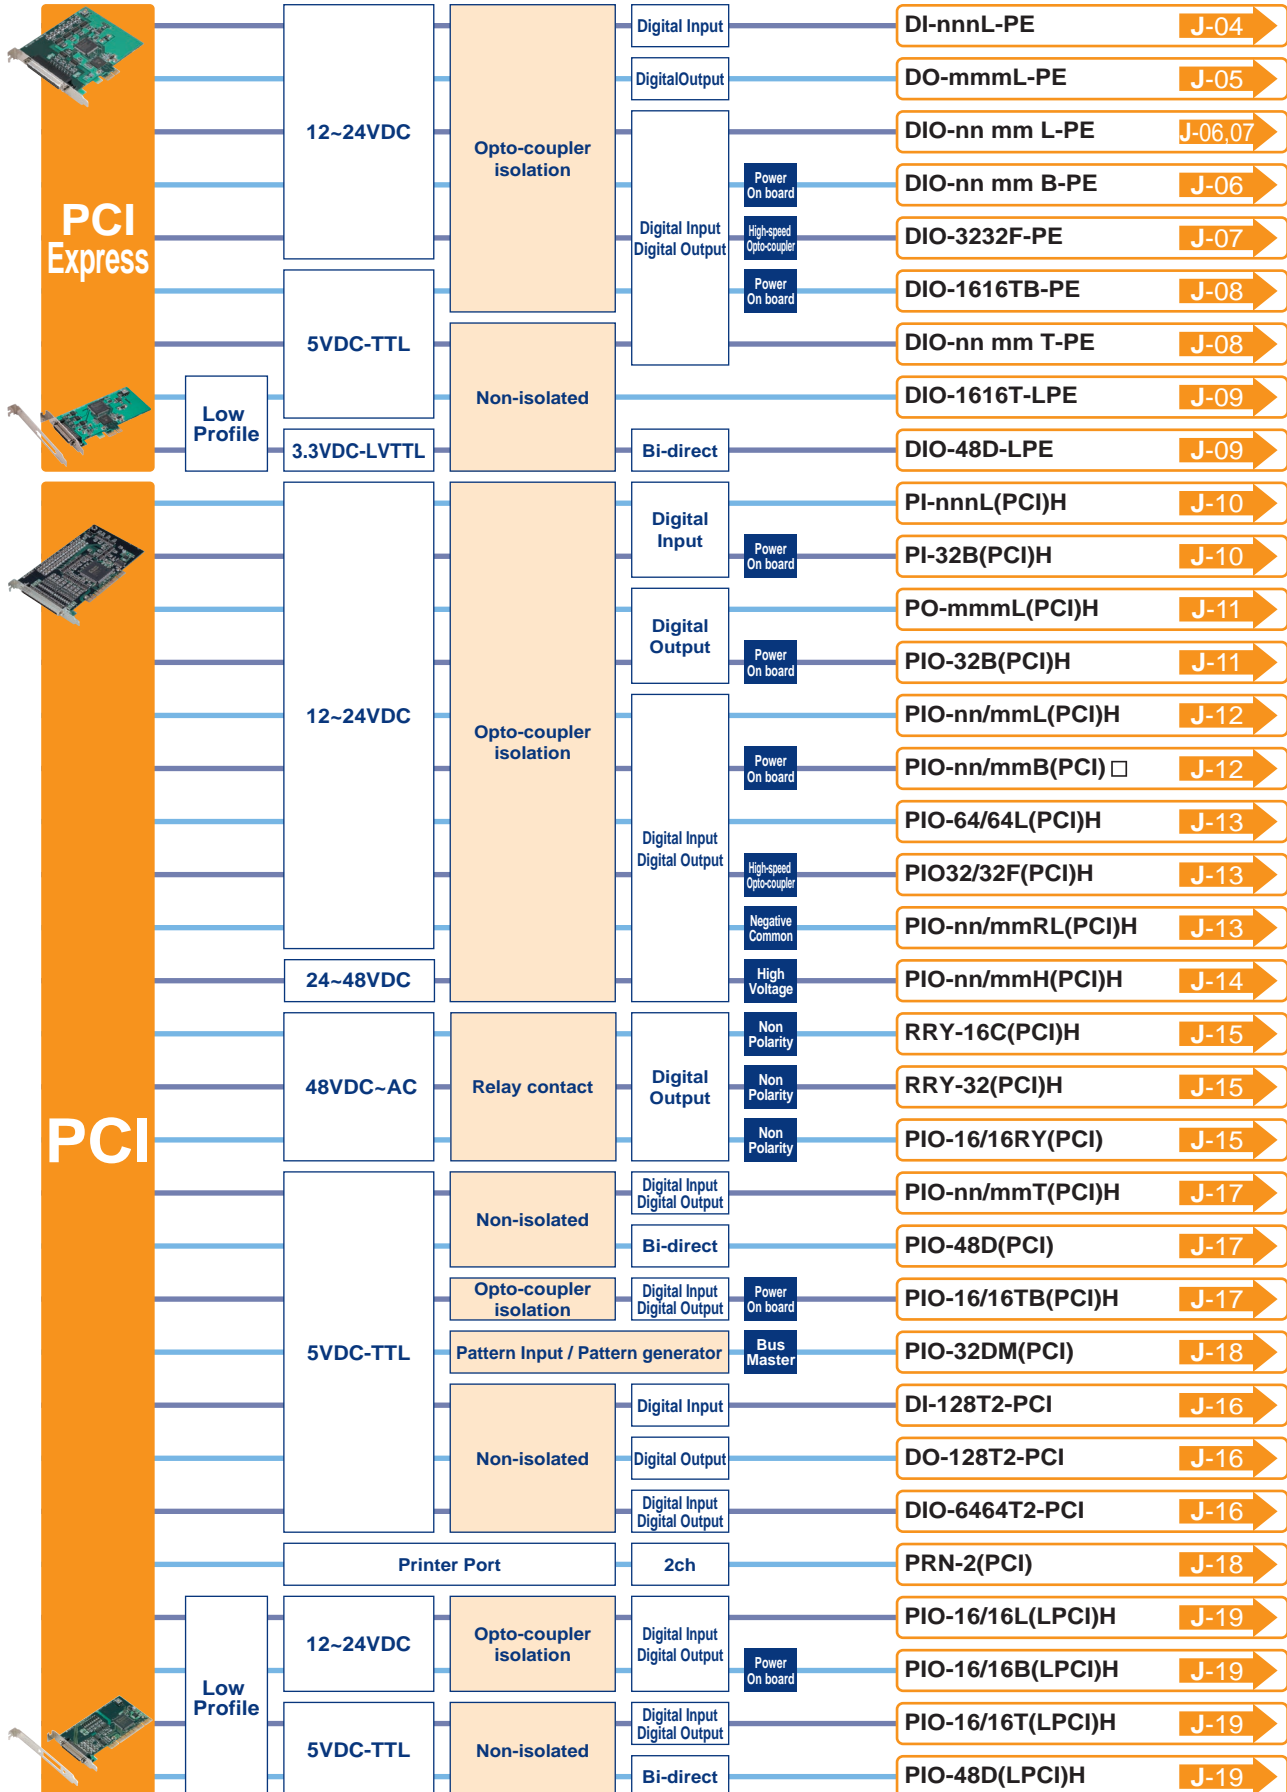

Non polarity I/O interface supports both current sinking circuit and current sourcing circuit.

Surge & Overcurrent Protection Output interface is equipped with both a Zener diode which prevents damage and / or malfunction due to a surge in voltage and incoming current and a policing switch which guards against damage due to any current overages.

TTL level Digital I/O DIO-1616T-LPE

- 16 TTL level input, 16 open collector output
- 200nsec high-speed response with non-isolated LVTTTL level I/O
- All input signals can be used as interrupts, allow/forbid interrupts and select interruption trigger edge in bit unit.
- Digital filtering function to prevent input error caused by noise and/or chattering
- Output ratings can handle up to 35VDC and 40mA per channel
- Low Profile PCI - compliant (includes bracket for use in standard PCI slot)
- Equipped with function equivalent to those of PCI-compliant board PIO-16/16T(LPCI)H
- Connector pin assignment compatible with PIO-16/16T(LPCI)H

- 200nsec high-speed response with non-isolated LVTTTL level I/O.
- All 48 input signals can be used as interrupts, allow/forbid interrupts and select interruption trigger edge in bit unit.
- Digital filtering function to prevent input error caused by noise and/or chattering.
- Input/output switching can be set via application software
- Low Profile PCI - compliant (includes bracket for use in standard PCI slot)
- Equipped with function equivalent to those of PCI bus-compatible board PIO-48D(PCI), PIO-48D(LPCI)H and CardBus-compatible PIO-48D(CB)H
- Connector pin assignment when using cable DIO-68M/96F is compatible with that of PIO-48D(PCI) when using PCB96P-** and PCB96PS-**P series (optional cables).

PCI 100-pin 0.8mm Pitch Input 64 Output 64 Isolated Digital Filter Surge & Overcurrent Protection CE

Windows Driver Linux Driver LabVIEW

Opto-Isolated Digital I/O PIO-64/64L(PCI)H

- 128 I/O on a PCI short-size board
- Digital filtering function to prevent input error caused by noise and/or chattering
- 16 interrupts featuring Digital Filter Function
- Output transistor has built-in circuit protection (voltage surge, overcurrent)
- Optional Conversion cables (100-pin to 96-pin half pitch) available

PCI 96-pin Half Pitch Input 32 Output 32 Isolated Hi-Speed opto coupler Digital Filter

Windows Driver Linux Driver LabVIEW

Opto-Isolated High-speed Digital I/O PIO-32/32F(PCI)H

- Features High-speed opto coupler with 5µsecs (max) response time
- Digital filter and interrupt trigger edge can be set via software
- Connector pin assignment compatible with PIO-32/32F(PCI)

PCI 37-pin D-SUB Input 16 Output 16 Isolated Negative Common Digital Filter Surge & Overcurrent Protection CE

Functions

Bus Master Transfer

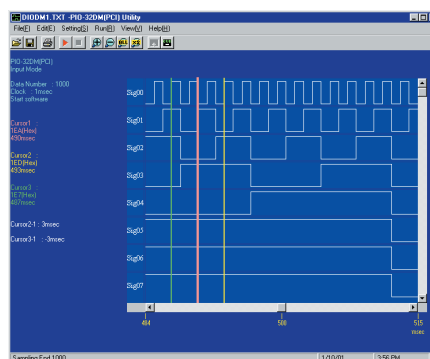

Utilizing Bus Master, the data transfer rate between the PC and CONTEC's PIO-32/32DM(PC) board is 80MB / sec. (133MB / sec. -max) without putting additional burden on the host computer's CPU.

Synchronization Control

The board is equipped with a synchronization control connector to allow easy inter-board synchronization. 16 boards (max) can be interconnected (including the master).

Pattern Input / Output

The PIO-32DM(PCI) stores digital signals at a sampling rate of 20 MHz and is capable of detecting patterns (pattern input). It can also be used as a 20 MHz digital pattern generator (pattern output).

Support Software

PRN-DRV(W32) LPT driver software for PRN-2(PCI)

PRN-2(PCI) drivers for Windows® PRN-DRV(W32) is a utility software that displays the LPT numbers assigned to the individual channels on CONTEC's PRN-2(PCI).

For latest driver versions, please visit our web site.

* Transfer mode is dependant on device type and operating system (refer to the following table.)

Device Type	OS	IEEE 1284				
		Compatibility	Nibble	Byte	EPP	ECP
IBM PC/AT Compatible	Windows XP/2000/Me/98/95	○	○	○	○	○
NEC-PC98-NX	Windows NT 4.0	○	○	×	×	×
NEC PC-9800 series	Windows 2000/Me/98/95	×	×	×	×	×
	Windows NT 4.0	○	○	×	×	×

As shown on the side of product's images, RoHS compliant is a CONTEC original marking for RoHS-compliant products.
