## Quick Installation Guide

## : Introduction

RGS-PR9000-A is advanced Layer 3 modular managed redundant ring Ethernet switch with 3 module slots. The switch is designed for power substation application and rolling stock application, fully compliant wh the support of Ethe $1850-3$, IEEE 1613 and EN $50121-4$. Wy the $<30 \mathrm{~ms}$ MSTP (RSTP/STP compatible) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. Otherwise, support wide operating temperature from $-20^{\circ} \mathrm{C}$ to $60^{\circ} \mathrm{C}$ when running with 10 G ports, and up to $-40^{\circ} \mathrm{C}$ to $85^{\circ} \mathrm{C}$ without 10 G port, RGS-PR9000-A can also be managed centralized and convenient by Open-Vision, besides the Web-based interface, Telnet and
console (CLI) configuration. Therefore, the switch is one of the most reliable choice for highly-managed and Fiber Ethernet power substation and rolling stock application.
Note: The product is unsupported hot plug function, if need to change switch module must be power off then can change.

## :- Package Contents

| Contents | Pictures | Number |
| :---: | :---: | :---: |
| RGS.PR9000-A-LV (10G) or RGS-PR9000-A RGS-PR9000-A-HV (10G) or RGS-PR9000-A-LV or RGS-PR9000-A-HV |  | x 1 |
| Console Cable | $($ | x 1 |
| CD | $8$ | x 1 |
| QIG | $\square$ | x1 |
| Screw (M3 X4) | * | x 8 |
| $\underbrace{\substack{\text { Rit } \\ \text { LRR) }}}_{\text {Rack-mounted }}$ | $0(i) 6$ | x 1 |

## $:$ Preparation

Before you begin installing the switch, make sure you have all of the package Before you begin instaling the switch, make sure you have all of the packag
contents available and a PC with Microsoft Internet Explorer 6.0 or later, for
using web-based system management tools.

## Safety \& Warnings

Elevated Operating Ambient: If installed in a closed or multi-unit rack assembly, the operating ambient temperature of the rack environment may
greater than room ambient. Therefore, consideration should be given to installing the equipment in an environment compatible with the given to ambient temperature ( $T$ ma) specified by the manufacturer:
Reduced Air Flow: Installation of the equipment in a rack should be such hat the amount of air flow required for safe operation of the equipment not compromised.

Managed Gigabit Ethernet Switch

## Supported Modules

| Modules | Descripion |  |
| :---: | :---: | :---: |
| swm-80GT-A | Industrial 8-port Gigabit Ethernet switch module with 8×10/100/1000Base-T(X) ports | Gigabit Ethemet module |
| swM-44GTP-A | Industrial 8-port Gigabit Ethernet switch module with $4 \times 10 / 100 / 1000$ Base-T(X) and $4 \times 100 / 1000$ Base-X, SFP socket | Gigabit combo module |
| SWM-08GP-A | Industrial 8 -port Gigabit fiber module with $8 \times 100 / 1000 B a s e-X$, SFP socket | SFP modue |

## : Installation

- Rack-mounting
front mounting brackets to the switch using 4 M3 screws on each sid provided with switc
tep 2: With front brack ogether. Fasten together using remaining M4 screws into counter sunk holes.
Step 3: Fasten the front mounting bracket to the front of the rack

The switch supports maximum three RJ-45 modules, giving you Lotal of $24 \mathrm{RJ}-45$ ports. Follow the Step 1: Switch off the power of the switch.
Step 2: Inse tot 12 and the modules in Slot 1,2 , and 3 respectively.
Step 3 : Switch on the power of the switch

## SFP Module

The switch supports maximum three SFP modules, giving you a
total of 24 SFP ports. Follow the steps bellows for installation.
Step 1: Switch off the power of the switch.
Step 2: Insert the modules in Slot 1,2, , and 3 respectively. the switch

## - Panel Layouts

## ver Module

The switch supports maximum wo power modules. Follow the
step 1: Switch off the power of the switch.
Step 2: Inse
Power 1 and 2 sl modules in
Step 3: Switch on the power of
the switch

Oring

## Quick Installation Guide

- Network Connection

The device comes with standard Ethernet ports. According to the link type, the switch uses
CAT $3,4,5,5 \mathrm{e}$ UTP cables to connect to any routers, or hubs). Please refer to the tollowing table for cable specifications. Cable Types and Specifications:

| cable | Tpe | Max leģh | Cometor |
| :---: | :---: | :---: | :---: |
| 10aser T | Cat. $3,4,51000 \mathrm{omm}$ | UTP 100 ${ }^{\text {(328 fit }}$ | R/4, 4 |
| 1008ASETX | Cat. 50000 mm UP | UTP 100 ${ }^{(3288 t)}$ | R.45 |
| 10008SETT | Cat. Gatat se 10.0.ohm UTP | UTP 100m (238t) | P/45 |

For pin assignment, please refer to the following tables.

- Wiring

Power innuts
The $G S$-PR9000-A series support dual redundant power supplies, Power Supply 1 (PWR1) and Power
Supply 2 (PWR2). The connections for PWR1 PWR2 Supply 2 (PWR2). The connections for PWR1, PW
and the RELAY are located on the terminal block.
STEP 1: Remove the transparent protective cover from the terminal block
STEP 2: Insert the
ck NT+ terminals, respectively.
STEP 3: To keep the DC whires from pulling loose, use a
small flat-blade screwdriver to tightent screws on the front of the terminal block conneclamp
screws on the rront of the terminal block connector.
cover back to the terminal block.
Relay contact
The switch provides fail open and fail close options for you to form relay circuits based on your needs. If you want the relay device to start operating at power failure, attach the two wires to COM and fail close to form a close circuit, vice versa. The relay contact of the 2 -pin
terminal block connector will respond to user-configured events according to the wiring

- Grounding

Grounding and wire routing help limit the effects of noise due to electromagnetic
Grounding and wire routing help limit the effects of noise duue to electromagnetic
interference ( EMI). Run the ground connection from the ground screws to the grounding
surface prior to connecting devices.

## Configurations

After installing the RGS-PR9000-A and connecting cables, start the switch by turning on power. The green power LED should turn on.

- LED indication table

. Launch the Internet Explorer and type in IP address of the switch. The default static IP address is 192.168.10.1

2. Log in with default user name and password (both are admin). After logging in, you should see the ollowing screen. For more information on configurations, please refer to the user manual. For Information on operating the switch using ORing's Open-Vision management utility, please
fo to ORing website.

Resetting
To rebor best button for 5 seconds
To restore the switch configurations back to the factory defaults, press the Reset button for 5 seconds.
